PROFILE

Detail-oriented professional with a background in software development and a strong focus on problem-solving, risk analysis, and process optimization. Transitioning to enterprise risk analysis to apply technical expertise in identifying, assessing, and mitigation business risks while supporting strategic decision-making.

PROFESSIONAL EXPERIENCE

- Full Stack Developer**, *The Chamber of Us* [🔗](#) 2025 – present
- Design and Develop *Recipe Empire*, contributing to frontend architecture, product structure, and contributor experience.
 - Collaborate with backend developers, designers, and researchers on a remote, mission-driven team aligned with global sustainability goals.
- Software Engineer (Founder)**, *Bondi Code* [🔗](#) 2023 – present
- Design and develop 20+ custom websites and applications using HTML, CSS, JavaScript, React, and Ruby on Rails for clients across industries, including e-commerce and professional services, driving an average 30% increase in online sales and improving user engagement through modern, responsive designs.
 - Integrate third-party APIs, such as Google Maps and social media platforms, and implement payment gateways, inventory systems, and analytics tools using Ruby on Rails, JavaScript, and PostgreSQL, improving site functionality and increasing client operational efficiency by 40%.
- Web Development Instructor**, *Le Wagon* [🔗](#) 2024 – 2025
- Instructed 4 cohorts, teaching full-stack web development to over 100 students, with 95% success rate in graduates securing roles within six months.
 - Mentored students through over 20 hands-on projects, including the design and deployment of complex web applications, API integrations, and database management using Rails and related technologies.

EDUCATION

- Software Development**, *Le Wagon* 2023
- Completed an intensive full-time boot camp focused on full-stack web development.
 - Successfully developed two projects, applying learned skills to develop fully functional web applications using HTML, CSS, JavaScript, React, Ruby on Rails, PostgreSQL, and Git.
- Bachelor of Arts - Digital Media and Visual Communications**, *University of Buenos Aires* 2014
- Developed user-centric design skills via coursework in visual communication and digital media, focusing on creating engaging web interfaces.

SKILLS

Front-End: HTML/CSS; Sass, Bootstrap, JavaScript, React, Responsive Design Techniques, **Back-End:** Ruby, Ruby on Rails, PostgreSQL, Python, Django, Flask, Restful APIs, **Design/UX:** Figma, Illustrator, **Cloud:** Cloudinary

CERTIFICATES

Application Security for Developers and DevOps Professionals: Learned secure coding, DevSecOps practices, and vulnerability analysis using tools like OWASP ZAP, Snyk, and Bandit.

AWS Cloud Solutions Architect: Trained in designing secure, scalable cloud architectures using AWS. Focus on compute, storage, networking, and cost optimization.

IBM AI Developer Certificate: Completed a six month intensive AI development program focusing on the advanced application of Python and prompt engineering for creating, deploying, and managing AI-powered solutions.
